

# Product Sheet

## Features

- Automatically process incoming payments
- Check the current balance
- List all bank transactions (from-to)
- List new bank transactions (new from the last listing)
- Send payments to Czech bank accounts
- Send payments to foreign bank accounts
- Send EURO payments
- Ready-to-use out of the box

## Description

FIO Bank API Client integrates payments into your business. You can automatically determine when someone has paid you, the amount, the reference, and process the payment in your system.

Additional need to understand your account balance and send payments is also satisfied, as well as historical listing of all transactions in a specified period, and listing of only new transactions.
